

## FIRST VISIT PROTOCOL

Based on the work from **Piet Seru, JP. Meerseman, Joseph Shafer** and **Walter Schmitt**. Compilation of more than 10 years of experience in those clinical gems in a structured protocol that you cannot miss.

### CONTENTS

Do you want to know how to integrate basic and advanced AK procedures in your clinic? Do you want to learn a system to assess the priorities that must be treated in a patient? Do you want to get better results with difficult cases? Then, this seminar is for you!

- ✓ **Key points to be successful with your patients.**
- ✓ **Electromagnetic interference.** *Shortcut and list of likely needed corrections. Quick reset.*
- ✓ **Pain locations and significance.** *What happens when they do not match the pelvic categories?*
- ✓ **Unhiding systemic priorities.** *Dehydration; glycemic disorders; dysautonomia; inflammation.*
- ✓ **Structural, chemical & electromagnetic stress.** *Challenges and advanced corrections.*
- ✓ **Structural priorities.** *IRT. Dural Torque. Meerseman protocol. Rib torque. Uncoupled vertebrae. And more...*
- ✓ **Multiple weak muscles.** *Where to start?*
- ✓ **Cranials.** *Quick screening and advanced corrections related with discal, immune, and endocrine problems.*
